

Working tools

Moil point

Chisel

Blunt tool

Poor quality tools can be a very expensive investment. If you're unlucky, fittings from low grade metal can shear off, enter the hydraulic system and cause serious damage to the breaker and carrier. Chicago Pneumatic tools are made from a nickel-chrome alloy that has been optimized for breaking applications. Each tool is precision formed and temper hardened for greater wear resistance.

Model	Part no.	Tool type	Tool width		Useful length of tool		Working tool diameter
